St. Albans

. . . . Regardless of your age, whether it be 0 or 99 or somewhere in between...our chiropractors at The Bassett Chiropractic Clinics in St Albans, Hertford and Watford help people with these conditions - and more!

Chiropractic is a primary health-care profession that specialises in the diagnosis, treatment and overall management of conditions that are due to problems with the joints, ligaments, tendons and nerves of the body, particularly those of the spine.

Treatment consists of a wide range of manipulative techniques designed to improve the function of the joints, relieving pain and muscle spasm. Chiropractic does not involve the use of any drugs or surgery.

It is a common misconception that Chiropractors only treat back and neck conditions.
