About Us

Principle Healthcare was formed in 2002 by a team of healthcare industry professionals whose passion and belief was to develop the opportunities in the UK and overseas for "A healthcare Business which could make a real difference".

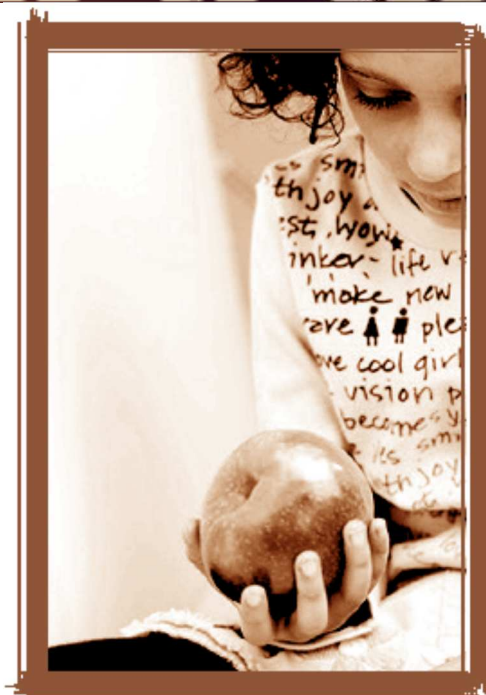

Principle (a fundamental truth, a moral rule, uprightness, honesty and guided by rules and conduct) was chosen as the perfect name to describe the nature of our business.

We are located in Skipton, North Yorkshire, in a modern, extensively fitted out production facility. We are fully accredited to the Higher Level of UK Quality Standards and use only the very best raw materials from leading manufacturers and suppliers from around the world. As a result we now supply some of the world's largest retailers.

All products comply with EU legislation and our in-house Quality management System is certified against the Highest Levels BRC Global Food Standard and we are members of the Council of Responsible Nutrition.

We have recently gained an Accreditation for [ISO14001 Environmental Standard](#) and have also been successfully accredited by the [Halal Food Authority UK](#).
